Instalación de Guacamole Web App

1. Instalar Tomcat

```
sudo apt install tomcat9 tomcat9-admin tomcat9-common tomcat9-user -y
```

2. Descargar binarios

```
sudo wget https://downloads.apache.org/guacamole/1.5.5/binary/guacamole-1.5.5.war
```

3. Mover el ejecutable a la carpeta del Tomcat

```
sudo mv guacamole-1.5.5.war /var/lib/tomcat9/webapps/guacamole.war
```

4. Reiniciar servicios

```
sudo systemctl restart tomcat9 guacd
```
