

Mantenimiento de base de datos SQL

- [Copias de seguridad](#)
 - [Copia de seguridad rápida](#)

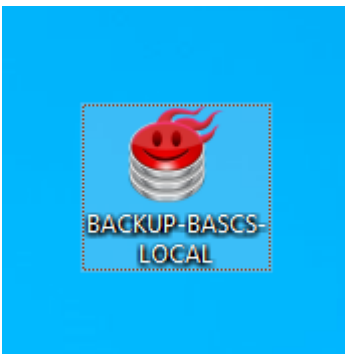

Copias de seguridad

Copia de seguridad rápida

1. **Conectarse** vía escritorio remoto al servidor SQL

2. Identificar el archivo de configuración de copias de seguridad rápida y **ejecutar** haciendo doble click.

3. Se abrirá un perfil de copia de seguridad precargado, únicamente debe de realizar **click** en el botón **Run Now**

The screenshot shows the SQLBackupFree application window titled "BACKUP-BASCS-LOCAL - SqlBackupFree". A green banner at the top offers a 30% discount coupon. The interface includes a menu bar (File, Tools, Help) and a toolbar with icons for New, Open, Save, Jobs, Log, and Advanced. On the left, there is a "Connect to SQL Server" button and a list of databases to back up, including BASCS, BASAP, BASCoreAdmin, MILLENIUMFOX, ICR, QUICKPOS, licences, PDV, and BASCS 421. The main configuration area on the right is divided into sections: "Store backups in a Local/Network folder" (checked), "Send Backups to FTP Server" (unchecked), "Send e-mail confirmations" (unchecked), and "Schedule to run this job daily" (unchecked). The "Run Now" button is located at the bottom right.
