

Copia de seguridad rápida

1. **Conectarse** vía escritorio remoto al servidor SQL

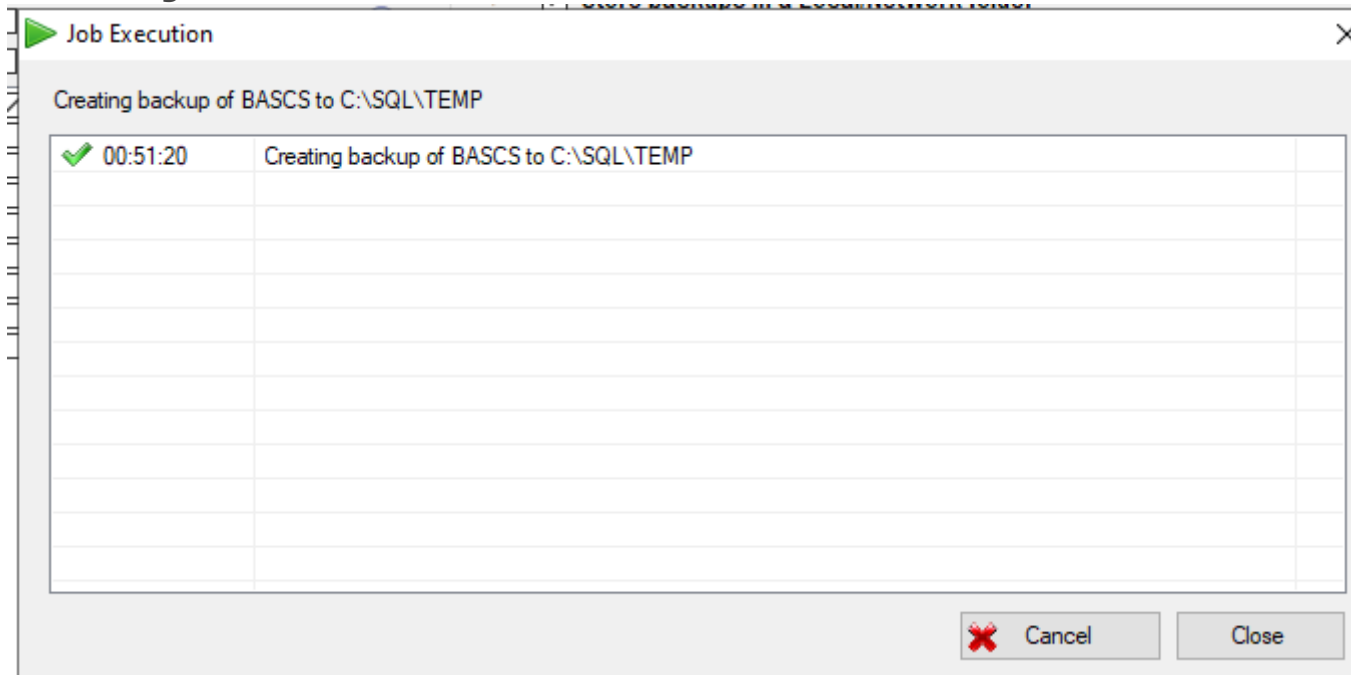

2. Identificar el archivo de configuración de copias de seguridad rápida y **ejecutar** haciendo doble click.

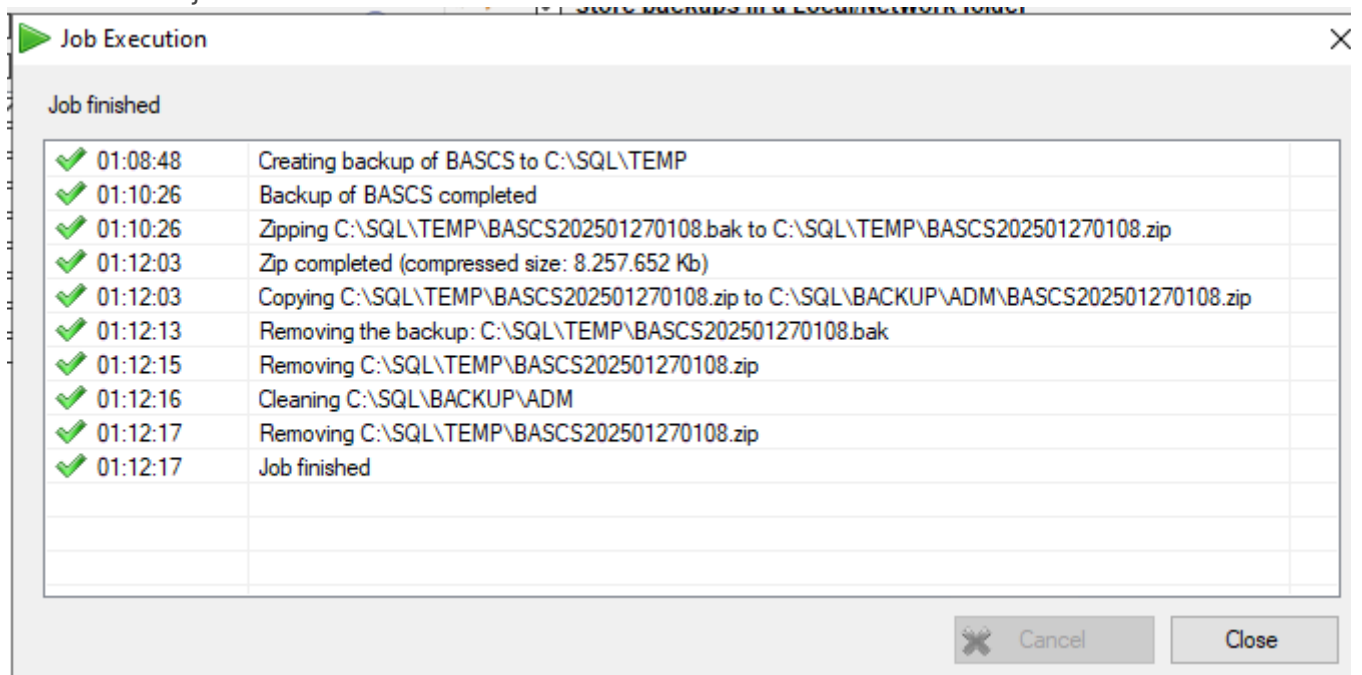

3. Se abrirá un perfil de copia de seguridad precargado, únicamente debe de realizar **click** en el botón **Run Now**

The screenshot shows the 'SQLBackupFree' application window titled 'BACKUP-BASCS-LOCAL - SqlBackupFree'. A green banner at the top offers a 30% discount coupon. The interface includes a menu bar (File, Tools, Help) and a toolbar with icons for New, Open, Save, Jobs, Log, and Advanced. On the left, there is a 'Connect to SQL Server' button and a list of databases to back up, including BASCS, BASAP, BASCoreAdmin, MILLENIUMFOX, ICR, QUICKPOS, licences, PDV, and BASCS 421. The main configuration area on the right is divided into sections: 1. 'Store backups in a Local/Network folder' (checked), with a folder path of 'C:\SQL\BACKUP_ADM' and retention settings of 0 months and 15 days. 2. 'Send Backups to FTP Server' (unchecked), with retention settings of 6 months and 0 days. 3. 'Send e-mail confirmations' (unchecked), with fields for success and failure email addresses. 4. 'Schedule to run this job daily' (unchecked), with a start time of 01:00 AM. A large green 'Run Now' button is located at the bottom right.

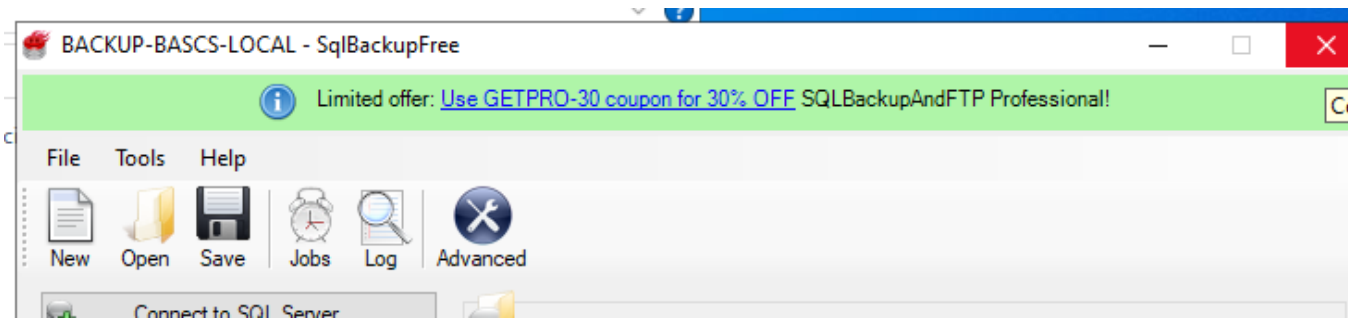

4. Iniciar la tarea de copia de seguridad rápida. Esta tarea podría demorarse hasta 5 minutos. **Aguardar.**

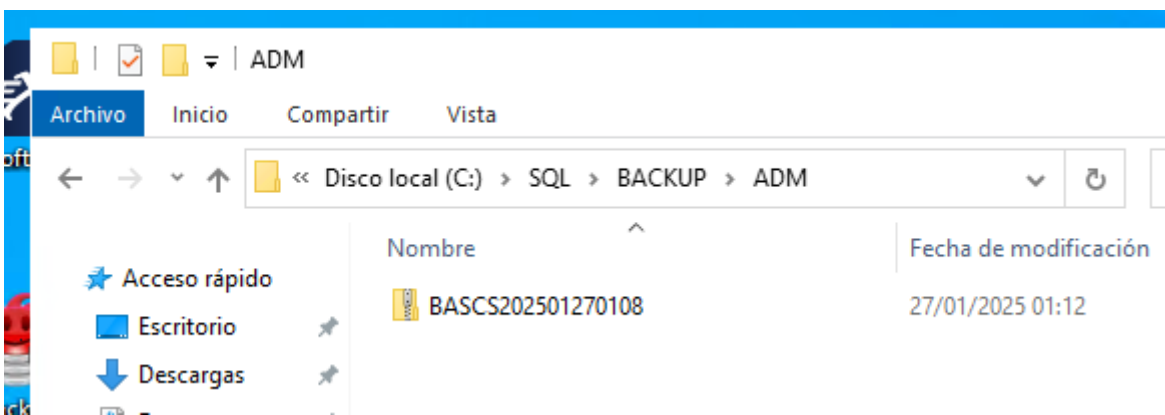

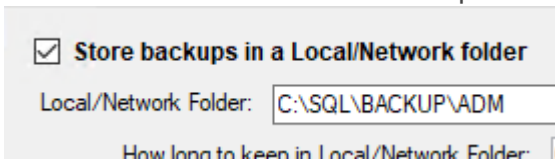

5. Una vez que el programa emita el mensaje: **Job finished**, podemos entender que el programa ha finalizado la tarea de copia de seguridad. Hacer click en **Close** para cerrar la ventana de ejecución de tarea.

6. Cerrar programa de copia de seguridad.

7. Confirmar la realización de la copia de seguridad, en la ruta especificada en el perfil.
